English

ABOUT ME

Experienced Java Developer with nearly 6 years of expertise in designing, developing, and optimizing scalable applications. Proficient in Spring Boot, Microservices, and cloud technologies, with a strong background in Agile methodologies. Passionate about building high-performance solutions and driving innovation in software development.

WORK EXPERIENCE

TATA CONSULTANCY SERVICES

MAR 2024-PRESENT

IT Analyst - (Role- Developer)

Home Depot - eCommerce Application(US)

Worked on the development and enhancement of Home Depot's eCommerce platform, utilizing Microservices architecture. Implemented CI/CD pipelines in GitHub and tracked services using REHUB. Developed backend services using Spring WebFlux, Spring Boot, Maven, and Gradle. Deployed cloud-based solutions on GCP with Cassandra as the database. Focused on high-quality development by implementing Unit Testing (UTs) and following Behavior-Driven Development (BDD) methodologies.

PAYROLL- ORBIT NEXT(CLIENT- MPSEDC)

AUG 2023- MAR 2024

Java Developer

MPWQC - Government Work Quality Council (Work Management System)

Developed and maintained a government work management system for MPWQC at MPSEDC, enabling efficient on-site surveys for work projects. Designed and implemented Microservices architecture using Spring Boot with MySQL as the database. Ensured smooth CI/CD deployment using GitHub Actions.

PAYROLL- AGILE LABS(CLIENT- MPSEDC)

OCT 2022- JUL 2023

Java Developer

DHS - Director of Health Services (Work Management System)

Developed and maintained a government work management system for DHS at MPSEDC, facilitating on-site surveys for health-related work projects. Designed and implemented Microservices architecture using Spring Boot with MySQL as the database. Ensured seamless CI/CD deployment using GitHub Actions to enhance system reliability and efficiency.

TOOLS

Eclipse
IntelliJ
STS
SQL Server
MY SQL
Git
SVN
Rihub
Big Query
Postman
AI Tool
JIRA

WORK EXPERIENCE

PAYROLL -NETLINK(CLIENT- NIC)

SEP 2021- OCT 2022

Software Developer

Government Farmer Support System – NIC

Developed a secure government project for farmers at NIC using a Monolithic architecture with Spring Boot and SQL Server. Focused on high-security measures to ensure data integrity and system reliability.

MAESTROS INFOTECH

FEB 2019- SEP 2021

Android Java Developer

Developed three Android projects using Java technology with a focus on security. Additionally, worked on two Java-based projects utilizing Spring, Hibernate, and MySQL for robust backend development.

INTEREST

Cloud Computing (AWS, GCP, Kubernetes), DevOps (Docker, Terraform, CI/CD), Scalable Backend Development (Reactive Programming, Kafka, GraphQL), Security & Performance (OAuth2.0, API Gateways), AI/ML Integration (Generative AI, LLM APIs).
